Desired position and salary

Senior Frontend Engineer

3 800 \$ in hand

Specializations:

— Programmer, developer

Employment type: full time

Work format: remote

Desired travel time to work: any

Work experience — 17 years 3 months

February 2025 —
May 2026
1 year 4 months

Vault

Frontend Engineer

- Developed and maintained fintech web products for fiat/crypto on/off-ramp, admin panels, analytics dashboards, and landing pages.
- Designed critical user flows covering onboarding, KYC, transactions, analytics, lists, and filtering.
- Defined web application architecture to meet SLA requirements: resilient backend/API integrations, isolation of domain modules, and data-quality controls at system boundaries.
- Evolved a white-label solution with UI customization and support for multiple client brands from a single Git repository.
- Turned Figma designs into responsive screens and reusable UI components.

Technologies: React, MobX, Next.js, Zod, Tailwind

May 2021 —
November 2024
3 years 7 months

Humaniq

Tech Lead Frontend / React Native

- Designed and evolved the client application of a non-custodial crypto wallet for EVM-compatible networks, covering transactions, signing, and status rendering.
- Implemented an embedded dApp browser and integrations with dApps.
- Expanded the product ecosystem with lending/compound-like applications, charity scenarios, and Humaniq ID as a KYC-like module.
- Led the frontend direction: architectural decisions, code review, task decomposition, prioritization, and release readiness.
- Maintained steady delivery through PRs at ~2.8 PRs per week, with fast review turnaround and regular inclusion in the release train.
- Kept a predictable release cadence: median interval between releases was 30 days, while hotfix patches were delivered within 1-2 days.

Technologies: React Native, MobX, Ethers.js

August 2019 —
April 2021

Lad group

1 year 9 months

Team Lead Frontend Engineer

- Designed frontend architecture for a BIM-based construction project management system.
- Implemented a tree-based UI for BIM model management and unified filtering models for complex data.
- Introduced PWA patterns, including offline caching and graceful degradation, to improve application resilience.
- Planned sprints, distributed workload, and led delivery of technically complex tasks.

Technologies: React, MobX, PWA

December 2018
— July 2019
8 months

All.me

Frontend Engineer

- Developed a blockchain-based social network.
- Refactored state management by migrating from Redux to MobX, reducing regressions and speeding up new feature delivery.

Technologies: TypeScript, React, MobX, Redux

December 2017
— December
2018
1 year 1 month

Seldon

Fullstack Engineer

- Built UI and complex filtering for a public procurement system using Elasticsearch and painless.
- Participated in the transition from a monolith to a microservices architecture.
- Implemented orchestration of REST request chains via a saga-based approach.
- Implemented complex transactional flows via MSSQL stored procedures.

Technologies: React, Redux, Redux-Saga; ASP.NET MVC, Node.js, Python, Golang; MSSQL, RabbitMQ, Elasticsearch, Redis; Docker, Kubernetes, Helm, Prometheus, Grafana, Git, GitLab

May 2017 — July
2018
1 year 3 months

Lobachevsky State University of Nizhny Novgorod

Teacher JavaScript

- Taught JavaScript at the continuing education faculty.
- Adapted English-language courses to Russian and published the materials in open repositories:
 - <https://github.com/nimblemo/js-base-course>
 - <https://github.com/nimblemo/js-extend-course>

April 2017 —
December 2017
9 months

Artinvest 52

Fullstack Engineer (WebRTC)

- Researched and implemented WebRTC/streaming solutions, integrated server-side components.

July 2015 —
August 2016
1 year 2 months

Soliton

Web Developer

- Developed and maintained web applications and hosting infrastructure.

December 2010
— July 2015
4 years 8 months

Mondi Syktyvkar

Auditor FSC / ISO 14001

- Designed business processes and maintained standards.
- Built a system for reducing deviations in technological processes and analytical tools for metrics.

March 2010 —
December 2010
10 months

Mondi Syktyvkar

Optimisation engineer

- Participated in an operational optimization project (McKinsey principles).

June 2008 —
March 2010
1 year 10 months

Noshul forestry cutting

Engineer

- Planned maintenance/repairs, managed spare parts supply, wrote technical requirements for projects.

Further information

About me

- Senior Frontend Engineer with 8+ years of commercial web/mobile development in React, Next.js, TypeScript, and React Native.
- Primary focus is web frontend: React/Next.js client applications, UI architecture, state management, complex interfaces, forms and validation, and backend/API integrations.
- Mobile development with React Native for production applications with complex user flows.
- Domain focus: FinTech (fiat/crypto on/off-ramp, KYC, admin panels, analytics dashboards) and Web3/crypto (EVM wallets, dApp integrations, non-custodial flows).
- 17+ years of total experience across engineering, process, and lead roles, combining delivery, quality, and technical leadership.
- Actively exploring and applying AI-driven development: Dynamic Agent Skills, Agent Harness, multi-agent orchestration.
